FOR IMMEDIATE RELEASE

Montana State University has received the second installment of a \$17,843 U. S. Public Health Service grant for a three-year study of Bordetella pertussis, a causative agent of whooping cough, MSU officials announced.

Dr. Richard A. Faust, assistant professor of microbiology, is director of the research, which was launched a year ago with a grant of \$6,666 from the National Institutes of Health. The current installment of \$5,577 will support the study through November 1963.
